## PROFESSIONAL SUMMARY

Technology and business transformation executive with over 12 years of leadership experience driving digital innovation, enterprise transformation, customer experience optimization, analytics, and operational excellence across BPO, BFSI, technology, and customer service environments.

Currently serving as QA Director within a global enterprise environment, responsible for strategic quality governance, AI-driven analytics, executive stakeholder engagement, and enterprise-wide performance transformation initiatives. Proven success in leveraging technology, data, automation, conversational AI, and process optimization to improve customer outcomes, operational efficiency, regulatory compliance, and business performance.

Experienced in leading cross-functional teams, managing enterprise transformation programs, defining technology-enabled operating models, and translating business strategy into scalable digital solutions. Recognized for building Centers of Excellence, establishing governance frameworks, and driving innovation through data, automation, and artificial intelligence.

---

**READING, BOARD GAMES, PHYSICAL ACTIVITY**

I enjoy reading novels, self-improvement books, and biographies.

The board games I enjoy are chess, and scrabble.

For physical activities, I enjoy running and calisthenics.
